

GLR-AT6110-PM/2

Full Automatic Double Station Cap Visor Machine

Range of application

Product Features

- 1. Integrated Double-Station Automatic Control System:**
Ensures high-efficiency and high-quality sewing operations.
- 2. Double-Station Loading System:**
Enables automatic loading and seamless silo switching for continuous production.
- 3. Brim Center Positioning System:**
Facilitates precise positioning of brims across different specifications, ensuring consistent results.
- 4. Standard Line Break Sensor:**
Equipped with a bottom-line warning function for enhanced production monitoring.
- 5. Easy Operation:**
No skilled labor required—one operator can manage up to three machines, significantly boosting productivity.

Scope of Application:

Designed for high-quality sewing of decorative threads on baseball cap brims.
