

GLR- 630GT

Electronic Pattern Sewing Machine

Range of application

Product Features

- Integrated structure design with low power consumption, high efficiency, and high-speed performance.
- Independently driven middle presser foot with adjustable height to accommodate different sewing thicknesses, ensuring ease of operation.
- Standard large touchscreen panel with an intuitive interface for easy editing and setting of patterns and parameters, making it user-friendly and quick to learn.
- Adjustable presser foot angle with even pressure ensures accurate and smooth sewing, enhancing the quality of the final product.
- Range of application: Ideal for small-area pattern sewing (80mm x 60mm), such as bags, clothing, and other intricate designs.
- This feature-packed machine combines precision, efficiency, and convenience, making it a top choice for professionals.
